NATURE MEETS DESIGN

styleGREEN INDIVIDUAL installations of plants and mosses bring pure nature to interiors and modern design to walls. Diverse surfaces can be designed for office spaces, gastronomy, retail spaces and much more - whether on the wall, ceiling or furniture. The high-quality styleGREEN INDIVIDUAL productions are not only visually pleasing but also create a pleasant room atmosphere, project a feeling of tranquility and affect the room's acoustics.

DON'T WATER, JUST ENJOY

A natural preservation process gives the plant long-lasting durability. This way, the green works of art can remain beautiful for years and retain their natural look and feel. And best of all: the plants need no water or light thanks to this special ecological process.

BAVARIAN ORIGINALS

An experienced production team manufactures plants and moss surfaces in our styleGREEN workshop in Höhenkirchen, situated close to Munich. Every styleGREEN INDIVIDUAL installation is handmade according to your individual requests to fit your given concept, making each one a true original.

SPECIAL REQUESTS WELCOME

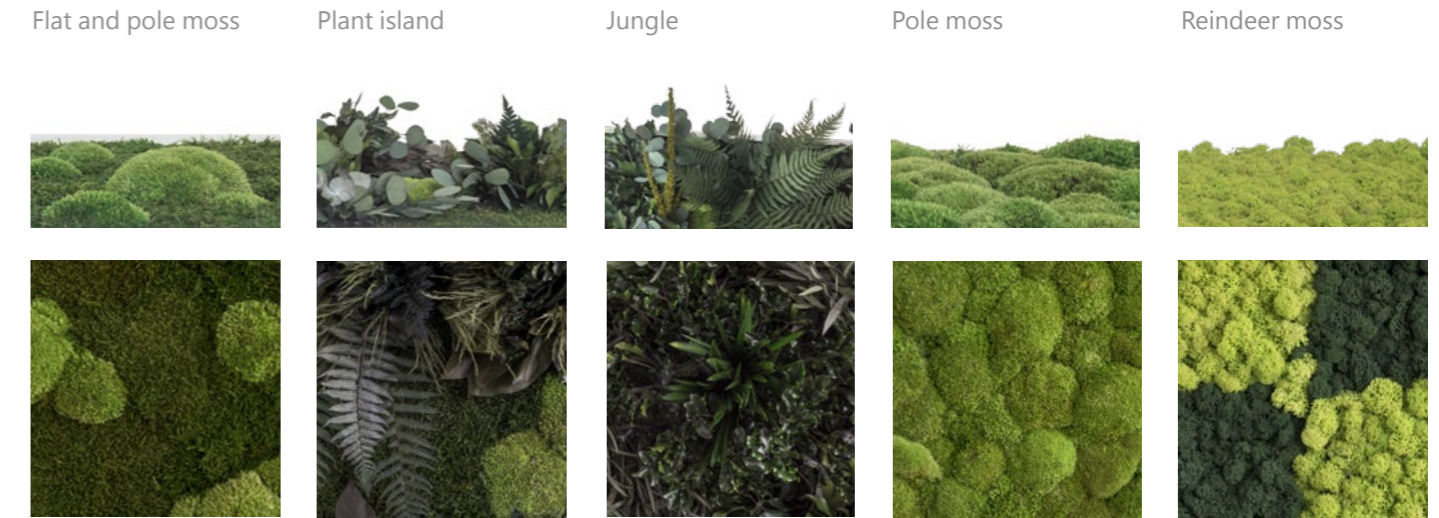

Whether you're interested in special shapes, logos or plant compositions, we look forward to your requests and are happy to implement your individual preferences. Productions in accordance with B1 fire protection regulations are also possible.

MODULAR. VARIABLE. INDIVIDUAL.

With the flexible styleGREEN INDIVIDUAL concept, we can offer the appropriate green arrangement for any request. The modular design and the five different types of planting varieties offer diverse opportunities possibilities for every application. At home or in the office, in hotels or at trade shows - the customized moss and plant walls can be perfectly integrated into any room. The green design and artistic arrangement create an extraordinary eyecatcher that you will enjoy for years thanks to the special natural preservation process.

FIVE PLANTING VARIETIES

FOUR EDGE FINISHES

This type is suitable for use in buildings, suspended ceilings, front walls and furniture. The edge of the 12 mm MDF carrier material is visible.

The MDF material is concealed by the greening of the edge and a natural overall appearance is the result. This type is possible for flat and reindeer moss surfaces.

The anodized aluminium profile silver has a height of 45 mm and a visible edge of 13 mm. It's mounted directly onto the wall.

This aluminium profile (height 45 mm, visible edge 13 mm) is matt black and anodized. It's mounted directly onto the wall.

**MATERIAL**

A gentle flat moss background with lush pads of pole moss. A varied and yet orderly design made of real, preserved mosses.

**TECHNICAL SPECIFICATIONS**

- > 12 mm MDF support plate with priming film
- > 2-5 cm planting height (not including MDF)
- > weighs approx. 11 kg/m<sup>2</sup> (incl. MDF support plate)

**ACOUSTICS**

- > affects acoustics in room

**FIRE PROTECTION**

- > B1 - certified support plates, adhesives & impregnation upon request

**PRODUCT INSTRUCTIONS**

- > No care, lighting or watering necessary
- > Direct sunshine can bleach the color of the plants after 2-3 years
- > Keep out of direct contact with water
- > Humidity over 70% should be avoided
- > Avoid extremely hot and dry air
- > The plants and mosses have a natural odor that decreases within 6 weeks

**AREA OF USE**

Wall and ceiling greening, furniture and object design, planting for the varioGREEN room separator, individual projects with logos or special shapes are available upon request.

**DELIVERY TIME**

3-6 Weeks

**MATERIAL**

Preserved nordic lichens create the base for the reindeer moss individual production on MDF. The bright green and the intensely saturated leaf green have a particularly good effect on large surfaces.

**TECHNICAL SPECIFICATIONS**

- > 12 mm MDF support plate with priming film
- > 6 cm planting height (not including MDF)
- > weighs approx. 14.5 kg/m<sup>2</sup> (incl. MDF support plate)

**ACOUSTICS**

- > Sound absorption certified according to EN ISO 354

**FIRE PROTECTION**

- > Certificate available upon request
- > B1 - certified support plate upon request

**PRODUCT INSTRUCTIONS**

- > No care, lighting or watering necessary
- > Direct sunshine can bleach the color of the plants after 2-3 years
- > Keep out of direct contact with water
- > Humidity should be between 40-70%

**AREA OF USE**

Wall and ceiling greening, furniture and object design, planting for the varioGREEN room separator, individual projects with logos or special shapes are available upon request. The reindeer moss MDF variant is particularly well-suited for elaborate designs.

**SPECIAL FEATURES**

- > Indicator for good indoor climate: attracts moisture from the air and releases it again.

**ASSEMBLY**

- > The carrier plates are modular or in one piece according to the dimensions you provide; lamello inserts ensure a correct fit without visible transitions
- > Simple assembly with the help of the modul map the installation guide and the pre-drilled holes in the module plates
- > Simple self-assembly by craftsmen or the styleGREEN assembly service (extra charge)
- > ALTERNATIVE: Reindeer moss flex elements for simple wall mounting with the convenient velcro system (standard product)

**DELIVERY TIME**

3-4 weeks

maygreen

leafgreen

**MATERIAL**

The flex elements consist of flexible reindeer moss mats that can be cut using box cutters or scissors if needed and easily mounted on the wall using the velcro system. The material is so flexible that it can be simply bent to a diameter of 50 cm.

**TECHNICAL SPECIFICATIONS**

- > 6 cm planting height incl. support mat
- > weighs approx. 7 kg/m<sup>2</sup>

**ACOUSTICS**

- > Sound absorption certified according to EN ISO 354

**FIRE PROTECTION**

- > Certificate available upon request

**PRODUCT INSTRUCTIONS**

- > No care, lighting or watering necessary
- > Direct sunshine can bleach the color of the plants after 2-3 years
- > Keep out of direct contact with water
- > Humidity should be between 40-70%

**AREA OF USE**

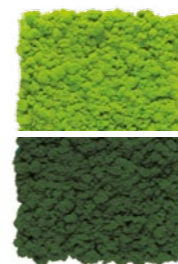

Wall and ceiling greening, furniture and object design, planting for the varioGREEN room separator. Reindeer moss flex elements are flexible and can be bent.

**SPECIAL FEATURES**

- > Indicator for good indoor climate: attracts moisture from the air and releases it again.

**Flex element 60 × 40 cm \***

(4 pieces per packaging)

maygreen  
sG-Pm\_Fe-60x40-Mg

leafgreen  
sG-Pm\_Fe-60x40-Bg

**ASSEMBLY**

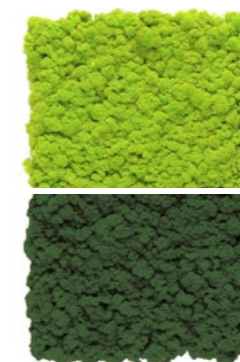

- > The flex elements are delivered with velcro strips, which can be attached to the wall according to the assembly directions.
- > The elements can be cut into individual sizes with scissors or a box cutter and then mounted on the velcro strips.
- > The screwless mounting system makes it easy to remount the elements into different positions.

**DELIVERY TIME**

1-2 weeks

**Flex element 100 × 60 cm \***

(2 pieces per packaging)

maygreen  
sG-Pm\_Fe-100x60-Mg

leafgreen  
sG-Pm\_Fe-100x60-Bg

\* For a combination of two or more elements, there may be a difference in surface area of 5 – 10%.

PUT YOUR LOGO ON A GREEN STAGE

Logos, lettering, shapes or similar: There are no limits to the imagination. We offer a range of possibilities to implement your corporate design. On the one hand, we can display shapes with the combination of flat and pole moss and on the other, two-tone surfaces made of reindeer moss in maygreen or leafgreen or other colors are possible. Letters and logos made of other materials such as acrylic glass or metal can also be integrated using spacers. Furthermore, we can also place plants directly onto letters or individual shapes. Get in touch so we can work together to develop a solution for your project.

VIEW. TOUCH. TEST.

With our styleGREEN INDIVIDUAL sample set, you can convince your customers of our products. That's because they can experience the structure, feel and smell that you can't get from looking at pictures. Present all five planting types and the aluminum edges in one easily transportable box. The reindeer moss planting is mounted using the flex element velcro method, so that you can test and demonstrate the system. We're happy to offer you the sample box for a six week loan or you can purchase it for extended use.
