JPPER Sit-Stand Solution Intelligent Electric Lifting Workstation

Upper Table

Intelligent Electric Lifting Table

Traditional whole desktop lifting is unnecessary.

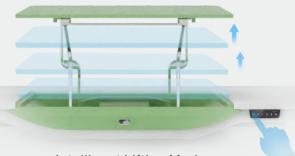

Modern office digital equipment are thinner and lighter, and it only needs office digital equipment to be lifted for stand working.

Therefore, the traditional whole desktop electric lifting table design is not necessary. The new design of Upper Partial desktop electric lifting will lead the electric lifting workstation to a new era.

Upper Arm

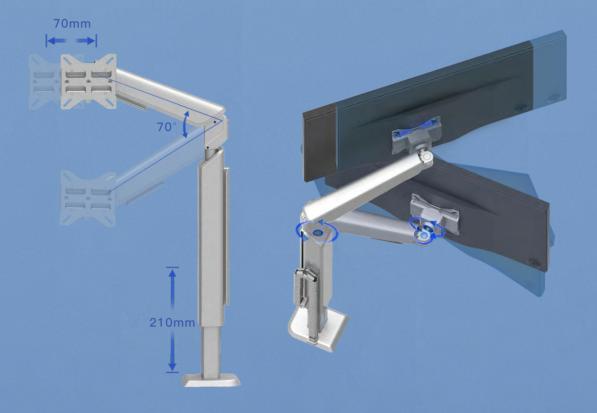

Intelligent Electric Lifting Arm

New Intelligent Electric Arm

Intelligent control lifting, Height adjustment, Any adjustment of the screen angle.

Smart interconnection with the Upper Table to achieve synchronous lifting through touch panel.

- 1 Intelligent control lifting & Height adjustment
- 2 Any adjustment of the screen angle
- 3 Sight distance Adjustment
- 4 Hidden wire storage

Touch Button

Upper Series Combination

Meet any combination of space planning to achieve hidden and penetrative wires.

Single Unit Table (no screens)

Upper Advantages on Space Planning

Upper Intelligent Electric Lifting Workstation is the best choice to replace traditional electric lifting table.

Upper Partial desktop electric lifting design is smarter and safer. Sitting and Standing alternately is easier to operate. The lifting design of the horizontal electric push rod solves high cost of the traditional electric motor. Upper Table is more cost-effective and easy to use popularly.

Traditional lifting table

Upper

Upper is more competitive in structural design.

The uniform design of the table legs makes it easier to plan the holistic space. The complicated structural design of the traditional electric lifting table has caused the increased cost. It is difficult for enterprises to use in large quantities.

Upper intelligent electric lifting screen with technology and intelligent design to meet the needs of private office, more humane.

Upper broke through the problem of the traditional electric lifting table. It achieves private and open work needs through two people sharing one lifting screen. The space layout is more technological, more complete and integrated, and more innovative. This is impossible for traditional lifting tables.

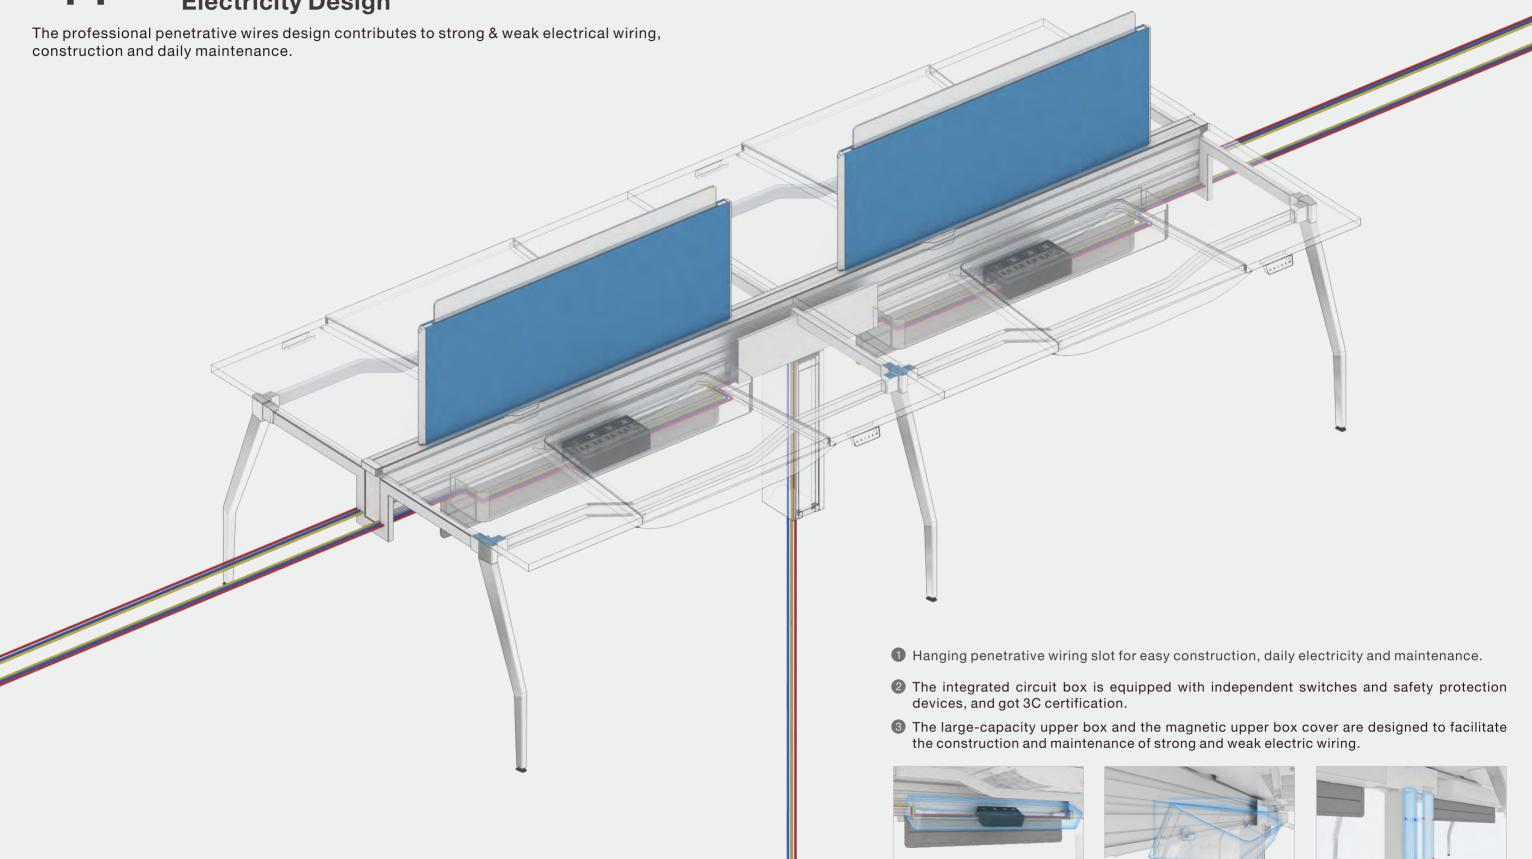

Upper has achieved the design of hidden and penetrative wires.

With the design of hidden and penetrative wires, Upper has broken through the problem that the traditional electric lifting table cannot be concealed wires. Even if traditional electric lifting table can achieve partial penetrative wires, but it need invest a high cost. And hidden and penetrative wires is standard match for Upper.

Upper Hidden & Penetrative wires And Strong & Weak Electricity Design

Integrated circuit box

Hanging penetrative wiring slot Magnetic upper box cover

Upper Healthy & Intelligent Control

Upper Healthy & Intelligent Control is interconnected to Upper Table, Upper Screen and Upper Arm to achieve smart adjustment and healthy care. It can remind actively standing work to make users to develop a healthy work habits with sitting and standing alternately.

Upper Table Settings

Height adjustment, 3 different memory heights can be set according to requirements.

Standing Work Warning

Set continuous sitting time, start intelligent induction timing system, remind standing work actively.

Work Mode Evaluation

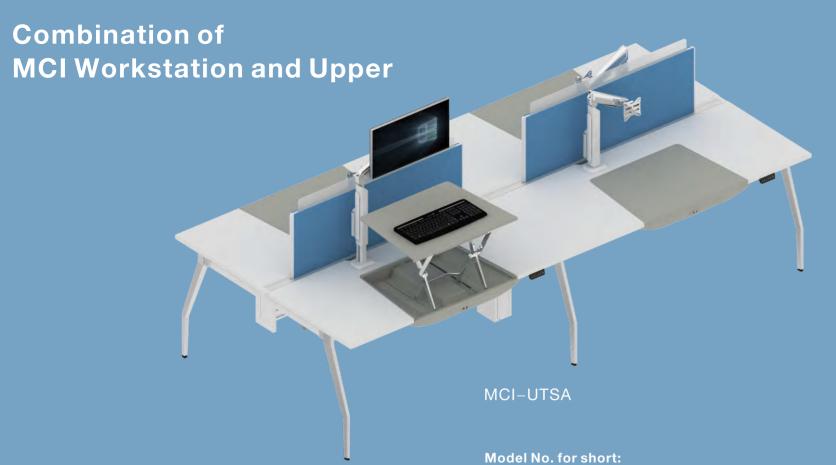

Timely feedback for work mode evaluation results, develop a healthy work habits with sitting & standing alternately.

Upper Healthy & intelligent Control, easy to operate

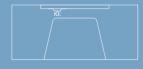

User manual is your good helper for intelligent operation.

Upper Diversified Combination

Match with Multi-dimensional curved surface cold pressing screens to enhance working privacy and expand storage space.

Upper Diversified Combination

Match with Mixstand series to meet different requirements of space planning.

STANDING WORKING POSTURE

Standing work is a healthy and efficient work mode. Proper standing work can avoid various diseases caused by sedentary and poor sitting posture to. protect employees health and improve work efficiency.

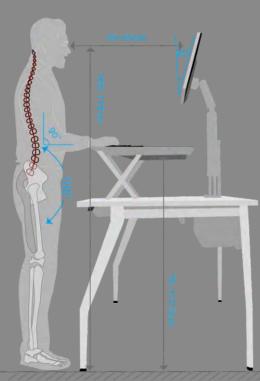

The study proved: standing office table is "value for money"

The researchers took 231 office staff in Victoria and provided 20% office staff with the standing office table. The first evaluation showed that the 20% office staff can save \$8,400 in health care costs and can prevent obesity and disaccharide urinary and cardiovascular diseases to increase the total life expectancy of 492 years. (From: Victoria, Australia Health Agency and National Health & Medical Health Council)

The benefits of standing work

In recent years, many studies in various countries around the world confirmed that sitting for long time would be bad for health. According to the survey, women who sit for more than 6 hours a day are prone to heart disease and cancer. Compared with women who sit for less than 3 hours a day, the probability of early death is also 37% higher.

In the same situation, men are 18%. The concept of "long time sitting affects health" has been agreed with more and more people. Standing work is popular around the world. (From: American Cancer association)

Sit-Stand Solution

Sitting & Standing alternately Standing work is more efficient

Sitting long time is usually associated with frequent back diseases (Mandal, 1981). Sedentary increases the pressure on the spine and intervertebral disc, causing strain on the back muscles and discomfort in the lower limbs. (Grand Jean and He Ting, 1977; Linde, 1989)

Work Mode of Sitting & Standing alternately is the healthiest

Work 8 hours a day, standing work for a minimum 2 hours, this is the healthiest office mode.

It is very important to equip employees with Sit-Stand workstations, which can avoid the occupational health hazards caused by sedentary. The health of employees is the source of company development and the Sit-Stand workstation is the productivity of company development.
