 **Nuvem**

## Design with a story

It's really a difficult and challenged task to create an innovational lounge chair that can break through the current lounge chair design. My philosophy of development is based on providing perfect sitting comfort to users. Adopt current trend of modern design elements to show the versatility and diversity.

The Nuvem chair has not only a stylish appearance, but also a comfortable and multi-used lounge chair with humanization design.

Director and chief designer

*Neil*

 Nuvem

GENIUS TECHNOLOGY

## The Genius Technology of Nuvem

- ① **Unibody 410mm Four Star Aluminum Base**  
Unique Aluminum base is machined from single piece of aluminum, allow hold up to 1,800kg, strength and lighter than a comparable steel or wood base.
- ② **Rotating Bar**  
This allows chair provide 360° smooth swivels and stability on reclining movement.
- ③ **Unibody Aluminum Body Fit Sub Skating Recline System**  
The multi functional body fit sub skating mechanism has build internally under flat shape unibody aluminum case, its thin and strength. Integrated to one piece beauty stylish design, this allow to provide perfect comfort and support to your back, thus reducing back fatigue. With stage less memory position locking function, allows you simply adjust your best comfort ergonomic position.
- ④ **Unibody Aluminum Adjustable Armrest**  
The armrest has adopted high strength aluminum material, with elegant stylish appearance design. This allow to hidden adjustable mechanism, notebook stand and iphone device into unibody aluminum armrest. Varied combination of features, represent high technology design ingenuity.
- ⑤ **Engineering Monomer casting Nylon Frames**  
Supporting frames has adopted environmental high recyclable rates engineering Nylon material. With its high strength and elastic characteristic, this enabled perfect matching upholster with high tech mesh fabric. This Combination has break traditional steel and wood frames, gives unmatched sitting comfort.
- ⑥ **Ergo Adjustable Headrest**  
Without changing recline position, user can simply adjust height of headrest to suit for personal comfort receiving best support to neck region.
- ⑦ **Philips Universal Speaker System**  
No batteries required Philips speaker system, allow you to connect your iphone ipod or any MP3 Players on Nuvem chair. The wonderful music gives user complete mind release and showing prefect human technology design.

- ⑧ **Genuine Top Grain Leather Arm Pad**  
We are using imported Europe top grain Leather, upholster above PU pad gives soft and gentle touch feeling.
- ⑨ **High Density Seat Front Edge Supporting Mold Foam**  
The waterfall seat front edge design adopt high density supporting mold foam ensure the user getting best support and receiving minimize leg pressure, providing best sitting comfort.
- ⑩ **Imported High Tech Mesh Fabric**  
The high technology mesh fabric, replace traditional steel frame and spring, our mesh has strength on toughness and elastic, provide best support and ensure durable construction.
- ⑪ **High Density Soft Supporting Memory Foam**  
The high density soft supporting memory foam, mould over high elastic tech mesh fabric, this combination provide best support and soft comfort, the tradition soft polyurethane foam are unable to create this elastic gentle soft support comfort to user.
- ⑫ **Super Soft Temperature Adjust Tech Foam**  
Adopt most advance technology and special formulated material, this enable to increase foam's water content, allow adjust temperature. This has improved the sedentary sultry situation from traditional polyurethane foam. Moulded on top of high density soft supporting memory foam, this combination create a excellent support comfort.
- ⑬ **Imported Genuine Top Grain Leather Cover Front And Back Of Nuvem Chair**  
The imported Top quality genuine top grain leather come from natural product, with light surface treatment provides a certain protection. The soft gentle allow to provide perfect comfort to user, Nuvem leather chair is one of the complementing design no matter in home or office environment.

New Body Fit  
Sub-Skating Recline Ergonomic Design

Innovational of new body fit sub skating recline design, allow user to use relaxing way to adjust its down and backward recline position. The more important feature for this new method of movement is when recline backrest angle will change, but the position of lumbar region will remain on same position. During reclining, the back has been fit on backrest together making movement, the lumbar region receive full support, provide best health recline new ergonomic feature.

- 1 Seat skating down and backward.
- 2 Ration of Backrest recline angle vs Seat angle change = 2.7° : 1°
- 3 Body fit with backrest movement, Lumbar region retain same position

Stage less Memory Position Locking

Stage less memory position locking, allow user simply adjust control button to set and adjust own best comfort ergonomic position, with automatic restore function, when user leave chair the backrest will automatic restore to original position.

User allow to recline at any comfortable position he prefer, and easily turn backward of control button to memory the preferred position. To Change other position can easily turn forward again the button, then backrest are free to move to any position.

Once user left the chair and come back sit on chair again, the memory locking memories the last set position.

When user left the chair, the backrest will automatic restore to original position.
